

ResultsVault

Cricket Results and Statistics Management

Online results and statistics management system

ResultsVault is a web-based results and administration service for clubs and associations that allows entering of match data and results so that a wide range of scorecards and statistical reports can be displayed.

The aim has been to create a user-friendly web interface that makes available a huge range of statistical and results based cricket reports and simplifies the entire administrative process at clubs and associations.

There is no requirement for software to be installed on your PC and the data entry task can be shared among many users. ResultsVault can be accessed directly or can be integrated into an existing website.

How does it work?

After a days play or at the end of a match, a user (which has been set up by the club or association) will log into the ResultsVault website and choose the match that they want to enter results for. Results can then be entered in a summary format (similar to most written match reports for an association) and then the entire match scorecard for that match including a written match review can be entered. This information is then immediately available on the Internet in the form of player averages, hall of fame, milestones, match reports and individual player reports.

The association has the option of verifying and locking results if it chooses and having ladders automatically calculated.

Benefits of using ResultsVault

When designing ResultsVault the main objective was not only to provide an online platform for cricket results and statistics, but to reduce the amount of time required to administer and manage cricket clubs and associations.

The developers of ResultsVault have all been involved in the running of cricket clubs and associations over the last ten years and know the amount of time spent on collating results, calculating averages and designing draws.

ResultsVault has a number of system processes designed specifically to reduce the time and effort required to perform these tasks.

Timeliness, availability and accuracy of information have also been big problems for clubs and associations. Information such as "Who is leading the averages", "Who has played the most matches" and "What has made highest score" enrich the sense of history and give performances their due recognition within sporting organisations.

ResultsVault full match scorecard report. Both teams can enter the match result and optionally enter the full scorecard for their respective teams.

“All data is entered and accessed through user friendly web pages”

Main Features

(see the next page for a full list of features in ResultsVault)

The main features and benefits of ResultsVault can be summarised below:

- Full match scorecard data entry
- Wide range of statistical reports including individual player reports, averages and club reports
- All data is entered through user-friendly web pages.
- Email to players and contacts – bulk or individual
- Time saving administrative features for both clubs and associations including player registration, draw creation and member communication.
- Team selection and player availability
- Fixture and match details display including venue location.
- Fantasy League
- Unlimited number of "logins" to share the administrative load
- Data is managed centrally and therefore the accuracy of information is improved as everyone is updating and using the same version of the data.
- Individual player reports – by season or career
- Secure – your information is password protected.
- Can handle past seasons data and historical records
- Save money in reduced printing, postage and photocopying.
- Save time in have to “re-process” match reports and calculate ladders

Our aims

ResultsVault aims to produce a nationwide cricket results and administration service for club cricketers throughout Australia. This will help cricket as a sport at the grass roots level and also assist at the elite level by giving national and state cricket bodies timely information to be able to spot young talent and track participation levels.

We are committed to continual development of this product through the creation of new features and reports and the refinement of existing ones.

Part of a season fixture generated by the ResultsVault draw generator

Pricing/Availability

We support:

- State Accounts - where the the state cricket body sponsor a number of associations into ResultsVault and get access to state level functionality
- Association accounts - where associations "sponsor" their clubs into ResultsVault
- Club accounts - where the club's association does not have an account and fixture entry is handled by ResultsVault

ResultsVault is available now, and charges a service fee per participating team per season. Access to enter historical data is also available at reduced rates. Please email any sales enquiries to sales@resultsvault.com

Visit our website www.resultsvault.com to see ResultsVault in use.
